EDUCATION

The University of Texas at Dallas

Ph.D. in Computer Science | GPA 3.95/4.00

Richardson, TX

Aug. 2016 – Ongoing

Savitribai Phule Pune University

BE in Computer Engineering | GPA 73/100 First Class with Distinction

Pune, India

Aug. 2010 – May 2014

EXPERIENCE

Lymba Corporation

Software Engineer Intern (Part-time)

Richardson, TX

Jun 2021 - ongoing

- Currently working on designing a Question Answering system

Software Engineer Intern (Part-time)

May 2020 - Aug 2020

- Created a Word Sense Disambiguation tool using word embeddings and a rule based system
- Designed a benchmarking framework for a Python based machine learning framework

Software Engineer Intern

Jun 2019 - Aug 2019

- Created a machine learning framework to integrate Python deep learning tools with the existing Java NLP pipeline
- Designed Named Entity Recognition system using BERT and BiLSTM in Pytorch

Software Engineer Intern

May 2018 - Aug 2018

- Implemented a semi-supervised topic-based keyword extraction tool using word embeddings giving 2x accuracy and 8x time reduction over the existing system
- Designed algorithms to extract lexicons and generate BRAT configurations from an ontology

Bottle Rocket

Software Engineer Intern

Dallas, TX

Jun 2017 - Aug 2017

- Implemented multiple UX/UI stories for two Android applications that have been released on Play Store
- Followed SCRUM practice, GIT version control and JIRA for all the projects

Muffin App

Full Stack Developer

Pune, India

Feb 2016 - Jul 2016

- Engineered and developed the Muffin Android Application
- Developed Spring-Boot modules and assisted in designing the product system architecture

Great Software Laboratory

Software Engineer

Pune, India

Jul 2014 - Jan 2016

- Investigated the WebRTC protocol and modified it for an Elderly Video Calling application
- Found points of failure in an existing system and successfully scaled it up by more than 200%
- Mentored a junior employee in the development of a web-based graphical user interface for SIPp tool

PROJECTS

US Federal Elections Search Engine | *Java, MongoDB, Maven, Git*

Fall 2018

- Designed a continuous indexer using Single-pass In-Memory Indexing for 100k+ crawled web pages
- Implemented topic-based PageRank algorithm to rank indexed web pages
- Created the project development structure and assisted the team in API development and search result clustering

Sentence Similarity | *Python*

Fall 2017

- Designed a tool to measure similarity of two questions from a Quora dataset
- Evaluated different scoring functions and semantic features using SVM and Logistic Regression classifiers

DavisBase | *Java, Git*

Spring 2017

- Designed a database engine to perform CRUD operations with 9 other database commands
- Implemented B+ Trees for storing the data

Movie Rating Prediction | *Java, Git*

Spring 2017

- Implemented Collaborative Filtering for movie rating prediction on Netflix dataset containing 100M samples

ADDITIONAL EXPERIENCE

- **Teaching Assistant** at The University of Texas at Dallas (Fall 2017 - Spring 2021)
- **Git Essentials Workshop**, *Speaker*, The University of Texas at Dallas, Feb 2020.
- **Deep Learning Hands On**, *Speaker*, Dallas Natural Language Processing Meetup, June 2019.
- **Git Essentials Workshop**, *Speaker*, The University of Texas at Dallas, Jan 2019.
- **Topic-based Keyword Expansion**, *Speaker*, Dallas Natural Language Processing Meetup, August 2018.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS, PHP, Shell

Frameworks: Pytorch, Tensorflow, Node.js

Developer Tools: Git, Docker, Jenkins, RabbitMQ, ActiveMQ, Amazon Redshift, DynamoDB
